CAREER OBJECTIVE

To embark on a journey to join a dynamic and innovative software firm. I aspire to become an integral part of a skilled development team, leveraging every opportunity to enhance my knowledge and skills in the software development field. Through dedication and continuous learning, I aim to contribute effectively to the company's projects while evolving into an adept software engineer, ultimately driving innovation and excellence in the software industry.

PROJECTS

School Management System

kabhighschool.com   2023

- Developed a user-friendly school website using **Laravel framework.**
- Implemented an admin panel for school authorities to publish important notices in PDF format for public access.
- Enabled school authorities to post daily activities in a blog format, incorporating text and images.
- Leveraged Laravel Breeze to ensure robust admin authentication.
- Created an effective and efficient platform for school updates.

Appoinment Management System

lawsheba.com   2022

- **Laravel Framework**
- Built a Laravel-based multi-language supported website that allows the public to request appointments with lawyers for a law firm.
- Implemented an admin panel to facilitate authorities in managing and responding to appointment requests.
- Integrated email notifications to notify the company when an application is submitted and to inform the applicant of the response.
- Utilized MySQL for efficient data storage and retrieval.
